Seeking full time opportunities for Software Engineer position

Summary

Dedicated Software Engineer with around 2 years of professional experience specializing in backend development and scalable web applications. Skilled in creating maintainable code and efficient systems while collaborating across teams to deliver user-centric solutions.

Professional experience

- **Associate Software Engineer, Programmers Force (Shufti)** April 2025 to Present
 - Resolved client queries and delivered feature enhancements for eIDV (Electronic Identity Verification), improving issue resolution efficiency by 35%.
 - Integrated third-party identity providers, enabling 20% faster onboarding and improved flexibility in customer verification.
 - Optimized existing systems through bug resolution and code refinements, enhancing platform stability and reducing downtime incidents by 30%.
 - Supported Due Diligence services, strengthening compliance and fraud prevention measures, contributing to a 25% improvement in fraud detection accuracy.
 - Worked across KYC, KYT (Fraugster Monitoring), and eIDV modules, boosting transaction monitoring speed by 20% and ensuring scalable, compliant identity solutions.
- **Associate Software Engineer, NativeSol (Project-Based)** Jan 2025 to Mar 2025
 - Developed and optimized backend APIs, reducing response time by 30% through efficient query structuring.
 - Implemented JWT authentication, improving security by 40% and ensuring role-based access control.
 - Integrated AWS S3 for efficient storage management, reducing data retrieval latency by 25%.
 - Collaborated with frontend teams, reducing integration issues by 25% through detailed API documentation.
- **Associate Software Engineer, Tenz Soft Pvt Ltd.** Jun 2024 to Nov 2024
 - Design and developed the backend for a car advertisement platform, delivering role-based functionalities for Users,
 - Admins, and Bloggers, improving operational efficiency by 30%.

- Collaborated with frontend teams to integrate APIs, enhancing platform responsiveness and user satisfaction by 25%.
- Enhanced application performance through cross-functional collaboration and regular feature improvements.

Education

- **COMSATS University, Islamabad (Abbottabad Campus)**
Bachelor of Science, Software Engineering (2024) Sep 2020 - Jul 2024

Skills

- **Languages:** JavaScript , Python
- **Frameworks & Libraries:** Node.js, Express.js, Typescript
- **Databases:** MongoDB, MySQL, PostgreSQL, Sql-lite
- **Tools & Technologies:** Git, GitHub, GitLab, REST APIs, Postman, Selenium, Multer, AWS, Hostinger
- **Methodologies:** Agile Methodologies, Data Structures, Design Patterns, JWT Authentication, Web Sockets, MongoDB Change Streams

Projects

- **SubZero – Learning & Coaching Platform (MERN Stack)**
 - Developed and managed RESTful APIs, improving system efficiency by 30%.
 - Integrated real-time chat using WebSockets, reducing message latency by 40%.
 - Implemented playlist and sponsorship features, boosting platform engagement by 25%.
 - Technologies Used: Node.js, Express.js, MongoDB, React.js, JWT, Multer, WebSockets
- **Subhan Motors - Car Advertisement Platform (MERN Stack)**
 - Developed scalable backend APIs using Node.js and Express.js, enabling over 500 listings/month with role-based
 - authentication (JWT).
 - Built car listing features: post, edit, delete, and category-based filtering.
 - Designed a subscription system for automated email notifications, increasing user engagement by 40%.
 - Created an admin dashboard to track visitor metrics, users and manage car listings.
 - Technologies Used: Node.js, Express.js, MongoDB, React.js, JWT, Multer, Cloudinary
- **Crime Law and Consultancy Portal (FYP) | React Native, Node.js**

- Developed a secure mobile application for connecting citizens with verified lawyers for legal consultancy.
- Designed backend functionality to support React Native and MUI for seamless user interaction.

- **Independent Projects**

- Student Management System: Created using Django.
- Banking System: Developed using Java and GRASP Principles.
- Price Comparison Website: Built with Django and Selenium.
